COATED WINDOWS LAST LONGER

YOU'RE NOT SAVING MONEY WHEN YOUR WINDOWS DON'T LAST LONG...

Uncoated polycarbonate offers no protection against scratching, hazing, and the damaging effects of UV. Plus, cleaning an uncoated window can cause scratch marks that affect visibility.

MEASURING YOUR CUSTOM WINDOW

THESE TWO DIMENSIONS ARE NEEDED TO DETERMINE WHICH SHEET TO PURCHASE:

DIM A: The Height:

» Place your window on end upon a level space with the roof edge down. Measure (DIM A), from the floor to the highest point

DIM B: The Width:

- » Measure across the widest point (DIM B) to be sure that the width does not exceed 70"
- » If DIM A is less than 39" use Sheet #1
- » If DIM A is 39-47" use Sheet #2
- » Oversized molded sheets are typically 1-1/2" larger than stock (you cut it to fit)
